Life Cycle Assessment of Green Hydrogen and Carbon Capture Pathways for Low-Carbon Cement Production in Brazil

Feedback for the author(s)

Review file(s)

No files added.

Comments to the author(s)

The manuscript has been substantially improved and the authors have addressed my previous concerns. I only noticed a few remaining consistency issues between the revised manuscript, Supplementary Information, and the uncertainty-analysis files. These are minor and should be corrected before publication.

Confidential feedback for the Editor

Your recommendation	• ***Return for minor revision***
Is the study design appropriate to answer the research question (including the use of appropriate controls), and are the conclusions supported by the evidence presented?	• ***Yes***

Are the methods sufficiently described to allow the study to be repeated?	• ***No, but these points can be addressed with revisions***
Is the use of statistics and treatment of uncertainties appropriate?	• ***Yes***
Has guidance been provided on how overstated claims should be rewritten?	• ***This was not needed***
Is the presentation of the work clear?	• ***Yes***
Are the images in this manuscript (including electrophoretic gels and blots) free from apparent manipulation?	• ***Yes***
